Next Meeting: <u>Clear Vue</u> <u>Cyclones</u>

June 27, 2013 ▶ 6:30 PM ◀ Clear Vue Cyclones 8633 South 212th Street Kent, WA 98032

Association Officers

President—Open Position Membership—Allen McCall Treasurer—Chris Green Secretary—M. Erickson Raffle— Herb Stoops

> Steering Committee Allen McCall Chris Green Herb Stoops Paul Stoops

The following are volunteer positions and are not Officers of the Association

Webmaster Tom Howorth thoworth@gmail.com

> Newsletter Steve Krauss catbert@oz.net 425-746-5067

The Northwest Woodworkers Association May 2013 meeting was held at Woodcraft in Georgetown. Fifteen members were in attendance. Our need for a backup person to take notes in the meeting in the absence of our regular Secretary was presented to the group. Unfortunately, no one volunteered to help us out with this important function, so the need still exists. Some of our Steering Committee members were absent due to prior commitments, so there was no Raffle. Also, no one brought any items for a Show 'N' Tell.

Tom Howorth, Webmaster for our Association website, reported that further improvements to the website, such as the addition of a member forum, were still in the works and will be forthcoming at a later date. Tom Howorth was also our featured program presenter for the evening. He brought his Dremel scroll saw and gave us an informative and entertaining presentation on the use of the scroll saw. In addition, Tom also showed a number of his scroll sawn projects, including puzzles, plaques, a bowl, an intricately crafted fretwork holder for folders and papers. He also brought his IPad and showed a running slide show of his wide variety of other scroll saw creations.

Tom gave us a good description of the desirable features of a scroll saw and the wide variety of blades available for the scroll saw. He indicated that Olson brand blades were among his favorites because they are a cost effective alternative and were widely available. Other good brands include the Flying Dutchman brand, which can be purchased online. Pinless blades are preferred for internal cuts because a much small entry hole can be used. Thanks Tom, for the great informative presentation. I'm sure most of us went away with a new appreciation for the capabilities of the scroll saw and some thoughts about how we might use such a useful tool in our own woodworking.

The Steering Committee is concerned about the lack of response to our need for a backup Secretary, or at least someone who can take notes during the meetings. Remember, this is your Woodworkers Association, which will only function well if it receives full support of all of the Members. The Steering Committee, Membership Chairman, and Treasurer are all making serious investments of their time and talents to help the Association perform its primary goal of promoting woodworking and developing improved knowledge and skills among our members. Many of you have made major contributions to the Association over the past years, for which we are thankful. How about some of you who are among the faithful old timers or the wonderful group of newer members being willing to step in and fill this need for us? This task only involves taking informal notes which can be sent on to the Steering Committee for editing and inclusion in the Meeting Minutes section of the Newsletter.

Our next meeting will be held at CLEAR VUE CYCLONES, out in Kent. Their location is very easy to find right off Hiway 167 at 8633 South 212th St. Please find a map elsewhere in this Newsletter. Clear Vue Cyclones is a world-renowned manufacturer of high performance dust collection cyclones designed specifically for woodworking. Their unique use of clear, impact resistant PETG plastic material produces a durable product with the ability to actually see the cyclonic action taking place within the cyclone as the woodworking chips and dust are collected. The highly engineered design of their cyclones provides collection of harmful dust particles as well or better than any of the other cyclones currently available to the woodworker. Clear Vue builds their complete cyclone product line as well as many accessories right here in their Kent facility.

A forum for woodworkers of all skill levels to share their common interests Northwest Woodworkers Association	Northwest Woodworkers Association Steve Krauss, Newsletter Editor 16204 Main St Bellevue, WA 98008								
Member's Discounts	<i>(Continued from page 1)</i> In addition to cyclones, Clear Vue Cyclones also manufacture and market a line of dust collection accessories, including fans, impellers, fan motors, uniquely designed, self cleaning, blast gates to fit 6" PVC S&D ducting used by many woodworkers, multiport transitions, high quality pleated filters, bin level sensor systems, and remote controls.								
Crosscut Hardwoods 4100—1st Avenue S., Seattle 98134 <u>10% Discount</u> Rockler Woodworking 3823 Stone Way N. Seattle 98103 <u>10% Discount (not valid on power</u> tools)	Clear Vue Cyclones has asked us to notify you about the special pricing they will be offering on their products to Northwest Woodworkers Association members at this meeting. "We will offer your group a 15% discount and throw in 5 free gates with each order, how's that? Orders will need to be placed by the 5th of July and units can be picked up at the shop no later than the 12th of July." If you are in the market for high quality dust collection system components, be sure to attend to take advantage of this special offer. (BTW, the blast gates sell for \$15 each!) Purchasing locally saves substantial shipping charges! For further information about Clear Vue Cyclones, please visit their website: http://www.clearvuecyclones.com/ This informative site contains detailed information about their products, a user forum, and an extensive photo gallery of the many Clear Vue Cyclone customer installations and innovations.
